

I enjoy having the ability to choose any type of radio content whether it is rock, rap, country, etc. I also enjoy having the opportunity to listen to weather and traffic in and around my local area plus having the ability to find out weather conditions during my travels out of state. Another added feature is that I can go from state to state and the programming does not change one bit. The song station is on whether I'm in New York or I'm driving to California. I feel that XM Radio is a great asset for people who spend a good amount of time in their automobiles. I'm a dedicated listener.

Thank You

David Hessler
